

How Does 3D Lucky Dog Jackpot Work?

Rodear America is adding a 3D Lucky Dog Jackpot. It is a separate jackpot not associated with any of the regular classes and will run as a separate class with a fun twist to the game. Any handler and any dog are eligible, which means this gives everyone another place to run their dogs in a class that is not classified! The twist is in the payouts. Per the example below, 21 entries would be divided into 3 "tiers" of 7. After all entries have run, the scores/times are ranked in order 1-21 and the top 2 scores in each "tier" of 7 are paid. The number of tiers and places paid will depend on the number of entries.
